
Observed−count model diagnostics
A. Observed versus fitted counts
Observed deaths (square−root scale)
Fitted deaths (square−root scale)
0
5000
10000
15000
20000
Age
25
50
75
B. Deviance residuals
Count deviance residual
2
0
−2
These are in−sample model diagnostics, not held−out validation.
